

SECURE PEER TO PEER MONEY TRANSFER

Abstract of Disclosure

Direct money transfer between users of a computer aided transaction service such as an auction is accomplished by the use of a common money transfer agent, with which both parties will have established accounts. Security of such transactions is assured by embedding encryption characteristics into data strings exchanged and in which the identities of the parties and details of the transaction are reflected.

Figures

Figure 1: A line graph showing the relationship between the number of figures and the number of pages. The x-axis represents the number of figures (0 to 10) and the y-axis represents the number of pages (0 to 10). The data points are as follows:

Number of Figures	Number of Pages
0	0
1	1
2	2
3	3
4	4
5	5
6	6
7	7
8	8
9	9
10	10
